KONICA MINOLTA

bizhub 190f

For classic office needs

Office system bizhub 190f

The small-office communication-hub

Konica Minolta's new bizhub 131f/190f offers everything for the small office – in more ways than one: Whether installed right at the workplace or in a central office location, its many merits include flexible scanning, comprehensive faxing, speedy printing and convenient copying for single users or the small team.

Innovative technologies make the bizhub 131f/190f highly efficient and economic to operate. A standard multi-page scanner, G3 fax, GDI printer and A4 copier for the individual workplace, the bizhub 131f/190f is easily upgraded into a networked central office device and speedy PCL printer. On top, the amazingly low toner consumption brings attractive cost savings.

➔ The versatile workplace tool ...

With its standard USB 2.0 interface the bizhub 131f/190f is easily connected to any PC as efficient workplace scanner, GDI printer, copier and fax.

- It's a local TWAIN scanner for up to A4 originals; and colour TWAIN scanning makes it perfect for example to enhance users' own PowerPoint presentations.
- As standard GDI printer it delivers 13 (131f) or 19 (190f) A4 prints per minute at 600 dpi – more than sufficient productivity for most office applications!
- Also a standard copier for up to A4 size documents, it is everything a busy user needs. The integrated ADF means extra convenience whenever multiple copies have to be made.

➔ Workflow options

→ ... with generous central talents

At the same time the bizhub 131f/190f offers a multitude of merits as central communication device in the small office:

Flexible faxing

- The comprehensive fax functionality features standard 8 MB of fax memory, sufficient for up to 650 pages. No incoming faxes are lost due to lack of paper or no power.
- Ideal for central fax communication, it brings efficiency and reliability to the task with features like time-send, send via memory, autodial, polling and a spam filter. Password-protected secure faxing keeps incoming confidential information where it belongs.
- An integrated address book and generous 40 short dials make fax transmissions even more convenient. iFax enables high-speed fax communication via the Internet and brings attractive savings to telephone charges.

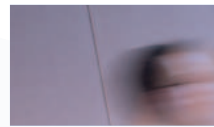

Versatile functions

- Network printing at 600 dpi with 10-Base-T/100-Base-TX support is available with the optional network interface card, which also enables network TWAIN scanning. Also optional, the IC-902 print controller upgrades the bizhub 131f/190f into a full PCL printer.
- Multi-access speeds up team work, enabling simultaneous printing and scanning or faxing, and minimising the wait for job completion.
- The standard 550-sheet paper capacity on the bizhub 131f/190f can be extended to a generous 1,050 sheets, making interruptions to bigger print and copy jobs a thing of the past.
- On the bizhub 190f a standard duplex unit further increases office efficiency with fully automatic double-sided printing and copying, saving paper and filing space at the same time.

Supports administration

- Enhanced user support includes advanced user authentication features and a useful accounting functionality. Security is all-embracing and dependable, with restricted user access and reliable monitoring ensuring that confidential information remains confidential.

→ Configurations

- Konica Minolta's PageScope Netcare makes available convenient device management for the bizhub 131f/190f. This helpful web-based utility minimises administrator intervention. All networked devices are displayed with individual icons, facilitating their configuration and management in a straightforward user interface. Device lists are updated automatically within specified time intervals, including the automatic addition of new devices.

Any small office wanting to optimise essential every-day tasks should give the bizhub 131f/190f some serious thought. Whether installed right at the workplace or as a central communication device, Konica Minolta's versatile little multifunctional is always up to the challenge!
